

SMARTBRIDGE — Customer Journey Map

Patient & Caregiver Experience Stages for MedSafe AI

Date:	August 12, 2026	Team ID:	MEDSAFE_AI_01
Project Name:	MedSafe AI — Healthcare Safety & Preventive Awareness Platform	Max Marks:	2 Marks

Phase of Journey	Stage 1: Prescription OCR Upload	Stage 2: Drug Interaction Checking	Stage 3: Symptom Triage & Advice
Actions (What customer does)	• Captures image of paper prescription using mobile camera. • Uploads file to MedSafe AI local dashboard.	• Enters drug names manually or selects parsed prescription items. • Triggers local interaction analysis engine.	• Enters current symptoms or warning keywords (e.g., chest pain, dizziness). • Reviews emergency score and education response.
Touchpoint (Service interaction)	• Streamlit OCR Upload Module. • PyTesseract Local OCR Parsing Engine.	• RapidFuzz String Matcher. • Local SQLite Drug Interaction Database & LLaMA 3 model.	• Symptom Red-Flag Keyword Rule Engine. • 1-10 Triage Score Dashboard Banner.
Customer Thought (What customer thinks)	• "Can this tool accurately read my doctor's messy handwriting?" • "Is my prescription photo safe on this local machine?"	• "Are these two medicines safe to take at the same time?" • "What specific side effects should I watch out for?"	• "Do I need to go to the Emergency Room right now?" • "Is this symptom severe or just a minor side effect?"
Customer Feeling (What customer feels)	• Anxious about misreading dosage codes (0-0-1). • Hopeful for an easy digitizing process.	• Cautious regarding severe drug interactions. • Reassured by plain-language safety summaries.	• Apprehensive about sudden health discomfort. • Relieved by clear risk levels and emergency instructions.
Process Ownership (Who leads this)	• Computer Vision / OCR Engineer	• Backend & Local AI / NLP Developer	• Clinical Rule Engine & UI Developer
Opportunities (How to improve)	• Add image preprocessing (contrast enhancement) for illegible notes.	• Expand local JSON drug interaction dataset with high-risk combinations.	• Add instant one-click hotlines to local emergency services.
