

SMARTBRIDGE — Initial Project Planning Template

Product Backlog, Sprint Schedule & Estimation for MedSafe AI

Date:	August 12, 2026	Team ID:	MEDSAFE_AI_01
Project Name:	MedSafe AI — Healthcare Safety & Preventive Awareness Platform	Max Marks:	5 Marks

Sprint	Functional Requirement (Epic)	User Story ID	User Story / Task	Story Points	Priority	Team Members	Sprint Start	Sprint End
Sprint-1	Prescription OCR Processing	USN-1	As a patient/caregiver, I can upload an image of a prescription so that the system extracts legible drug names and dosage frequencies locally using PyTesseract.	5	High	CV / OCR Engineer	01/09/26	14/09/26
Sprint-1	Typo-Resilient Matching	USN-2	As a user, I can enter misspelled drug names so that the RapidFuzz engine automatically corrects and maps them to standard pharmaceutical database entries.	3	High	Backend Engineer	01/09/26	14/09/26
Sprint-2	Interaction Detection Engine	USN-3	As a patient, I can check co-prescribed medication pairs so that I am instantly alerted to severe or moderate adverse drug-drug interaction risks via SQLite rules.	5	High	Backend Engineer	15/09/26	28/09/26
Sprint-2	Plain-Language AI Advice	USN-4	As a caregiver, I can view offline AI-generated safety summaries (LLaMA 3 via Ollama) explaining potential side effects without transmitting health data online.	8	High	AI / NLP Engineer	15/09/26	28/09/26
Sprint-3	Symptom Triage Scoring	USN-5	As a user, I can input current physical symptoms so that the engine calculates a 1-10 emergency risk score based on pre-compiled red-flag keyword rules.	5	High	Clinical Logic Dev	29/09/26	12/10/26
Sprint-3	Emergency Alert Overrides	USN-6	As a patient in distress, I can trigger red-flag keyword detection (e.g. chest pain) to display an immediate, high-visibility Emergency Room recommendation banner.	3	High	UI / Frontend Dev	29/09/26	12/10/26
Sprint-4	Patient Report Generator	USN-7	As a user, I can export a downloadable, structured Patient Safety Report PDF summarizing my active medications, interaction warnings, and triage levels.	3	Medium	UI / Frontend Dev	13/10/26	26/10/26
Sprint-4	Docker Containerization	USN-8	As a developer/admin, I can launch the entire Streamlit, FastAPI, PyTesseract, and Ollama environment using Docker Compose for seamless air-gapped execution.	5	Medium	DevOps Lead	13/10/26	26/10/26
