

SMARTBRIDGE — Project Initialization & Planning

Define Customer Problem Statements Template

Date:	August 12, 2026	Team ID:	MEDSAFE_AI_01
Project Name:	MedSafe AI — Healthcare Safety & Preventive Awareness Platform	Max Marks:	3 Marks

Customer Problem Statement Template: This template articulates challenges from the patient/caregiver perspective to focus on real healthcare pain points—specifically illegible prescriptions, severe drug-drug interactions, and symptom emergency evaluation.

PS No.	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A patient taking multiple daily prescriptions.	Safely take new prescribed drugs alongside existing medications.	I cannot easily verify if two drugs will interact dangerously or cause severe side effects.	Prescriptions are written using complex clinical jargon without clear patient-friendly warnings.	Anxious, uncertain, and afraid of accidental adverse drug reactions.
PS-2	A caregiver managing family medicine.	Digitize and accurately read handwritten or low-quality printed prescriptions.	Doctor handwriting and condensed dosage codes (e.g., 0-0-1) are illegible and confusing.	There is no simple offline tool to extract and structure prescription image text into clean tables.	Overwhelmed, frustrated, and concerned about giving incorrect dosages.
PS-3	An individual experiencing sudden physical discomfort.	Understand whether symptoms require immediate emergency room care or home monitoring.	Online symptom search results are overwhelming, alarming, or lack clear emergency triage markers.	Commercial medical platforms lack fast red-flag keyword detection paired with clear warning indicators.	Panicked, helpless, and unsure whether to visit the ER immediately.
