

SMARTBRIDGE — Empathy Map

User Empathy Mapping for MedSafe AI

Date:	August 12, 2026	Team ID:	MEDSAFE_AI_01
Project Name:	MedSafe AI — Healthcare Safety & Preventive Awareness Platform	Max Marks:	4 Marks

PERSONA / USER TYPE: Multi-Prescription Patient & Family Caregiver (e.g., managing elderly parents or personal chronic conditions).

SAYS

- "I can't read what the doctor wrote on this prescription slip."
- "Is it safe to take Aspirin along with Warfarin?"
- "I don't want to upload my medical records to an untrusted public website."
- "I need simple explanations, not complex medical jargon."

THINKS

- "What if taking these two pills together causes severe internal bleeding?"
- "I hope I am giving the correct 40mg dosage at the right frequency."
- "Is this chest tightness just acidity, or an emergency heart issue?"
- "I wish there was an offline tool to quickly check my medicines."

DOES

- Manually searches medical terms on internet search engines, getting conflicting advice.
- Squints at low-quality prescription printouts attempting to parse doctor notes.
- Hesitates or delays taking prescribed medicines out of fear of side effects.
- Asks family members or online forums to double-check medication names.

FEELS

- **Anxious:** Worried about accidental drug interaction risks.
- **Confused:** Overwhelmed by clinical abbreviations (0-0-1, QDS, Tab).
- **Protective:** Concerned about patient privacy and personal health data leakages.
- **Relieved:** When given an instant 1-10 emergency risk score and plain-language guidance.
