

SMARTBRIDGE — Brainstorming & Idea Prioritization

Idea Listing & Selection Matrix for MedSafe AI

Date:	August 12, 2026	Team ID:	MEDSAFE_AI_01
Project Name:	MedSafe AI — Healthcare Safety & Preventive Awareness Platform	Max Marks:	3 Marks

Step 1: Brainstorm and Idea Listing

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Mayank Bisht	Use RapidFuzz algorithm to handle misspelled medicine names (e.g., Aspirine -> Aspirin).	NLP & String Matching	Group 1
2	Mayank Bisht	Integrate local LLaMA 3 via Ollama to generate plain-language explanations of drug interactions.	Generative AI	Group 1
3	Mayank Bisht	Use PyTesseract OCR to read text from uploaded prescription images.	Computer Vision / OCR	Group 2
4	Mayank Bisht	Use LLaMA 3 with regex to format raw OCR text into a clean JSON table (Name, Dosage, Frequency).	Structured AI Parsing	Group 2
5	Mayank Bisht	Build a deterministic rule engine to detect red-flag keywords and assign a 1-10 Emergency Risk Score.	Emergency Triage	Group 3
6	Mayank Bisht	Store medical history in a cloud SQL database with cloud-hosted LLMs.	Cloud Infrastructure	Group 4

Step 2: Idea Prioritization

Group No.	Final Idea	Feasibility	Importance	Selected
Group 1	Medicine Interaction Analysis: RapidFuzz typo matching + Local JSON database + LLaMA 3 plain-language safety guidance.	High	High	Yes
Group 2	Prescription OCR & AI Structuring: PyTesseract image-to-text extraction + LLaMA 3 JSON parsing into structured tables.	High	High	Yes
Group 3	Symptom Risk Assessment: Rule-based red-flag keyword checker (1-10 risk score) + LLaMA 3 educational advice.	High	High	Yes
Group 4	Cloud Patient Portal: Cloud database with multi-user authentication and online third-party LLM APIs.	Low	Medium	No (Privacy Risk)
